Dear Customer,

Re: Product change notification for Harwin product.

There has been a change to the tape pocket and cover tape design on the following product:

- S7141-45R

Please see the latest Technical Drawing:

<https://cdn.harwin.com/pdfs/S7141-45R.pdf>

The tape pocket now has a channel running along the length of the tape, and the cover tape now dips down into this channel. This revised packaging method has been tested and continues to meet the EIA-481 requirements. The spring contact itself is not affected and remains unchanged.

This packaging improvement should minimise the risk of these miniature low-profile contacts turning or twisting within the pocket.

All new and existing orders at Harwin for this product will be supplied in the new tape and reel packaging. Distributor stock will be in the new design once current stocks are exhausted.

If you have any further questions regarding this letter, please do not hesitate to contact us.

Yours faithfully,

The Product Change Team
